

iClub™

The iClub System™

Smarter technology for better golf™

The iClub System is leading a revolution in golf instruction. Attach it to any club and the iClub **wirelessly** tracks your swing and provides real-time, 3D feedback both on and off the course.

Created by scientists from the Massachusetts Institute of Technology, our proprietary motion sensing technologies blend seamlessly with Artificial Intelligence to provide simple, easy to use feedback.

Whether you're an instructor using the system as part of your lesson program, fitting a guest for a new set of clubs, or tracking your student's performance; or, a golfer ready to unleash your potential, the iClub is proven to increase distance, improve control, and demystify the subtleties of the short game.

The iClub System™

Smarter technology for better golf™

Use it anywhere, anytime—at home, at the office, driving range, during play.

No limit on the number of swings you can capture (*average swing file is smaller than an email!*).

Share it with your students or a friend.

Compare your swing to the pros, your own, a friend, or your instructors with our Ghost™ overlay.

Use it on any club or brand (putter through driver).
